

My idea, my life and my time too.

Chapter 1.

In many years of life, I'm ready to write my feeling and my words, not so much to explain, much more to share my style, as I had to learn from many people and as I like to do.

This isn't very important to write my name here now, my idea is to share, to keep my experience and to write a book, because I wouldn't kick all my learning and I want to share in real my experience.

My style come from the people too, because I had many time to talk with many people and to learn the style of anyone from anyone, comparing and sharing, around the cultural sharing, art, music and anything around written poems, news or cultural texts.

As it's possible to understand, after many years, I feel to share some written words, phrases and ideas. Not so much to let learn, just to compare a style, to let know how we and how I love to talk, to write, trying in a easy style to let understand all, to leave each misunderstand and to keep on conversation each kind of argument. Now, I hadn't an easy life in the past, I'm not here to make the master of your mind, I'm not here to decide something about your life. Just, I feel to share my experience as I told and written in the first phrases of the book.

Between many chapters I will share poems or phrases of my mind, maybe I can take as example some phrases of other Authors if I feel, because we cannot live as humans only in one version of the life.

Now, between my time to write all, between my time to listen a futuristic movie, I take my time to write something like a book.

I want to share for free this book, because I want to share this style of language, this is a contemporary style, not so like the classical style of language, not so much like a slang, by the way, an very normal and practical style, to give a way if someone is not expert, to give a way to compare and this is not important to write a new story to share and to have something to read on life, this is like to speak face to face, without lies, without the hard work to read an encyclopedia or an complex story. Just the easy life and a new used style from people to take time together, to have conversation and to keep something of relaxing for the mind and the human too.

This style is light like the country music and like to have a good time for the right celebrations. I'm in my Christmas time, near to a good warm from fireplace, in a easy room, with a telly, the oven and some fruits on the table, one easy and good beer, one coffee and easy foods around, nothing of extra or unusual, sometimes one guitar on my hands, sometimes singing a song to use my voice in the lonely room, sometimes watching the telly, to listen what they do in a far state, far because I live in a Island, yes, I live in the Sardinia Island, still in a country place, country city and still between a town and small city, this is not all like the biggest city, this is not like the much more futuristic place, we haven't anything so easy, in the same time we try to have the enough to live and to be alive. At the moment, would be nice to write something to let you dream a new and maybe very dreamed modern life or something like the trip of mars, between any dream, we can talk of anything, the right, the wrong and the most important too.

Sometimes, in this Christmas time, I take some woods to prepare flutes by my hands, like handmade works, sometimes I take canvas and colors to paint, to create a world around me.

Now, I feel to write something else, near to my feeling and as I can too, the meaning... it's so easy... just sharing time and to have something to share, in the easiness and in relax too, because this is like to do Yoga or meditation for the relax of the mind. On country places and towns, the life... it doesn't run so much and when all is so quite, not so quickly and to run for nothing mean to kick on trash the life and the time, that's why this is important to find something to do, to manage all without the stress of the chaotic city.

To tell well... it's easy to compare the life on a big city full of people, full of cars and full of anything to do, hours and hours to go between the two poles of the city, so stress and spending hours and hours to do anything, in a small town or country city, the life is genuine and sometimes, this is the best if someone loves to create arts or to be composer, musician or writer too.

Look like an invite to take time on country city or country place if someone doesn't know how is the life. All around the changes from the state all are always around what the telly giving as news, around what kind of pic or image the telly giving to the capital city or the decisions of the parliaments of any telly states, sometimes, not the true too, sometimes between truth and fake too, all around the telly channel in watching at the time.

**My words are public domain because I speak as many people and this is like the language of a big part of people.
It's possible to describe all and not only and idea, not only the pic or the paintings of one life, because the life is like that we paint on our life too.**

Maybe between the expert painter and the begin, not so expert painter, painters of life, as the stories of the towns, between the normal people and the queer too. In a small town all strange is like a carnival dress, to see something of strange or queer... sometimes this is like to see a carnival meeting, because on normal life, anyone staying in the normality of a bored life too, looking for something of queer to change a bit the always same bored life, taking time to be upset with all around the changes forced from not very great minds too, looking the big shop of life too, with stories of bar clubs of the small towns and asking to ourselves how much we need to do much more then to be.

When I was child, not many children had many toys to play, all was all around how much someone was full of creativity... in a forgotten place, in a missed place, missed from God too sometimes, missed from God between nuns too! Between the time, looking for God in a lost church of life, of the forgotten place. But all is right, nothing wrong...

Just someone's looking to learn something of new to feel alive, because nothing disco clubs to have fan night by night, because nothing love to share or see the business of some too. All is a story, we can talk and describe all, like how much is ugly or funny, elegant, nice or wrong a place, because to decide this is not always the right too. Decide for others what is the right change to do, or let all forgotten place as God forgot to change too.

Now, this is like to say God Bless You, if you remember to Bless God too. The meaning is so and so easy, doesn't mean to explain so much, just, this is time to share, between lots of boring time too.

If I come back to the style between people, the wrong language is not wrong and the right language, this is not the language too, just, needs to understand something, anyone is busy on his life, busy on his work, busy on the craziness of the wonderful life, like a Las Vegas, looking to be winner of the enough to be alive and to live. To don't miss the dream to have an own life, not like slaves, by the way, not in the way in real, not like to walk in the street, just singing words to have the feeling, the feeling to compare ourselves on the same situation, looking to be winners, winners of the enough to be alive, this is not all around money, this is not all around the place, by the way, to live in a good life, to feel emotions, to feel love in real, or to watch the new soap opera of the show, around love or easy life too.

I come from the Artistic World and sometimes people love to see the show too (we the people to remember), the first show is the life too, because when the life is not much more so real, by the way, like the reality of the show... okay's... just to know the simple question, always the same dilemma... "to be" to say something like... like your imagination is ready to let you understand. Anything is a way of expression, in a phrase of a song, on book or in a quite time. Just to be alive in the world show.

Chapter 2.

What do you like to do for your freedom?

In many places around the world still they haven't this word on dictionary and sometimes some are thinking this is only an American word between many songs of the last or new album of the hit-parades of the far lands, where people are speaking another language, where people live another kind of life, not like our or they land too.

When promises are real from telly news, where salary is true and where people never die like our lands too, like their lands too. And... and... this is one part of truth.

Dreaming the equal life in a not so freedom one and asking to the mind: -what is the right way to take? As sure, the much more easy answer is to sing the song "My way" or if someone never had time to know this song, a similar song is "May Y"... Like Y and WHY and Way... when the pronunciation is like so and so funny, anything is all, in the same time anything is nothing, each meaning is not the meaning and the double meaning is only to tell something of easy, nonsense of the blind way of mind too. Like to say, the mind is much more full of lies then the soul.

Which sense you want to give, the first sense is in you too, to stay in myself, ourselves, not in the selfish of the selfishness.

Freedom, freedom's a dream, only, some are taking the boat to make a long trip or travel on a big part of ocean, flying and riding waves of sea to see the freedom, where the equal life is true!

The equal life like the equal respect of the workers of each very important works! Yeah... because the true is not the true, as the fake is not the fake too, all around a fifth, fifth of the party!

Alright, it's alright... we live to play too, in the funny and trying to take with a smile the badly too... living and die... to say... how much time passed first to see the freedom... etc...

Still some are thinking to watch the newest talk show of the season...

**Like to say... where war was the war last month by the telly?
Where was the good economy on the tv show?
Just all around the funny too... to don't cry on the milk in the glass to drink!**

**Just to write another page for the chapter of just to explain all in one long time... yep!
Well done... the freedom is now real, when we are ready to remember where, because some people are looking on maps where's the freedom on the towns around the towns, around the place of the places and this is all like to win the freedom in Las Vegas too...**

Like a Casino of the lucky day's.

The colors of words are giving a shape to the freedom too, where the freedom is still a dream, still some wait and wait the freedom in the life. Some are telling something like the freedom is not for free!

**As anywhere you can listen someone says:
...hey! Working and working to live!
Working and working for poor money!**

And the freedom is around how much you can buy on your life, some buy the ticket to ride a new life, the rich life, some buy only the ticket to go in the same poor life, dreaming all as always as the Christmas time, dreaming the toy gift from the celebrations.

Freedom is a very important word, only, cannot be only a dream, needs to be real, to give the chance to anyone, maybe between the chance to have a very real smile of happiness and not the smile of a crying mind.

Needs to stand up everyday, to keep his or her life, to keep our life too, to be part of this world and not staying in a isolated life, needs to

compare everyday and to understand that we cannot live in the lies of one dictator of the lies of some around fake promises of the equal life for anyone.

My first freedom comes from my chance to do my work on life, if my talent is around art and music, this is my right to do my work, to have the chance to make a presentation, to promote and share too.

When we haven't the chance to share, to promote and only restrictions are doing the ownership... restrictions from others not for us... meaning they leaving the freedom, the chance to live in the freedom in real.

Mean... they leaving the rights of someone or some others. The right to live, to work, to grow up and to make anything in a normal world, not under restrictions of and on anything.

Freedom is not only a dream, we need too and to remember too.

Chapter 3

Just light's

This is like to see the light and the sunshine, kicking the alienation of the the lonely philosophies and from wrong educations, living in the world as anyone, enjoy to have new friends around the world because we haven't to be taked or lost, we have to be alive, alive and enjoy because we can see the sunshine of anything and not only from the sun, not like stars in the night, not like the candle light in the darkness... Maybe, being light to learn something of new, to see well in the darkness too, without the light of a older candle light, with the light of our mind.

Around the shape of this light, this is like to see the multi-shapes of the Art, like the fabulous sculptures of the Greek Era, or the Roman Empire, in the same time the great sculptures from Italian talents of the great old school. Like the "David" or "La Pietà", both are an example of light, the Artistic Sun always and always it borrows light to

stars too, borrow for free and to let see the world full of new artists and creativity, like the mom when the mom gives milk to his small son.

Just light's, with the many colors of the light, around a rainbow of tonality, shapes and any kind of light and shadows too to let we enjoy because we don't live in a unique color in the life, we can see the colors from the darkness, the sad face of the moon, like crying moon's, the power light of the sun, with his hot warm too...

The same rule is on Art, the universe of talents, giving a new sky, when you take the time to look up, looking the sky, if you look well, you can see the universe, the light of each star and the storms between galaxies too. Like and hurricane of feelings and sensations.

I'm taking my time to write here now and in the same time I watching a movie, cooking my lunch in the night time, because, just to don't make all like the same routine or like the same draw of life of anyone, this is much more nice to have lunch at dinner time and to have breakfast after the midnight.

Yeah! To see the light means to see all with a different light too, the different light on our world, not only like a planet, much more like easy life too. To live like humans and not like cubes, to be ready to live with different shapes of life, the light to have a new idea of life style too, this is light too.

Chapter 4.

Preparing...

To prepare something or someone in this different style, we use some steps, the first step is around to have something like a confidential feeling, the other step will be to be part of the dialogues, conversations and sharing too.

What's the meaning? The meaning is I share, you share, we share.

Working of sharing, anyone learns from any other one too.

The first other steps are to live in the world between many people, talk with anyone and leaving the shy character on ourselves, leaving each kind of loneliness of the mind.

If you have time to know an open mind life, accepting any kind of differences and doesn't mean to accept anything as right, means to accept the world where you live, where I live and where we live.

Maybe with a bit of sense of humor too, or ironic too, or with funny meaning too as anyone is ready to do, accept the differences we are ready to stay in any kind of group of people, group of friends, group of work too. Because to work too, needs to accept coworkers too and partners of work too.

When you feel so ready to be part of a social life, staying between people, this is the right step, the social life is the result of a good life, to learn how to talk with anyone, how to stay with anyone (to don't misunderstand the meaning, means when anyone is doing right and not wrong, with respect between anyone).

Example of the examples, to share... to share and to share... etc... To share culture, to share phrases, to share experiences on work, life, talent too, to share a kind moment of relax too and to leave the selfish, because to live in the selfishness its much more easy way.

Asking to ourselves:

Are we ready to stay between people in a social life?

By my way, I can say yes, by your way!

Are you ready too?

Do you looking for the same social life?

Because we are here, between anyone, between people, anyone with his busy life, when we stay between anyone, to live in the social life this is very and very important, just leave a bit of shy from yourself and let be real the sharing. Cannot to be all business, if you are ready to live in a social life, you are ready to work in this world, to work for you, with people and for anything, to earn too.

And now...

Preparing myself, preparing yourself too by yourself, because if you are reading my words, this is one good step to have good time together here.

What all we can do to share, this is easy if we have the chance to share, always as anything this is not something to look for earn or to be rich

of money, as the life, as to have friends, to share help the life of anyone to live between anyone, with the dream of a perfect hypothetical life, or hypothetical wonderful world.

Just... understanding the meaning and how much it's important to share today, in this new Era, if someone is ready to understand how much it's important, doesn't need to ask to himself why to share or why not too! Just share!

**Anyone comes from his culture too, always, I say:
Never end to learn in the life.**

That's why, to increase the culture it's always very great for anyone, the one from the much more high level of education, it's great for the one with the not so high level too, because this is a chance to increase.

Talking of myself, I try to learn everyday, everyday something of new, something of unknown from my cultural books, something of unknown in my land too, because not anyone is ready to know all if he doesn't see, or if he is without the right books or a right group of people to share culture too.

When people aren't under isolation, they are ready to live in the social life with anyone, any group of people and between the many different cultures of the world.

For example, if you see this style to give a shape on text, to divide phrases and part of texts, I and we... we are using this style to make much more light the reading too, to give relax on eyes between the reading, eyes get tired and we need to see and to decide what's the right shape of page and text to use.

To separate phrases and chapters too. Short chapters are easy and light, this is to prepare someone too, to prepare someone too in a social life, to let understand how to give the stress of a bureaucratic style, it's not an help to invite someone to ready too.

Preparing myself, you preparing yourself, as example I live in Sardinia Island, we speak English and some are ready to have conversation, to compare too, to deal and to have high level too. Only and this is so easy to understand, must to be natural, must to be true, must to be for friendship too, to share, cannot to be only a business.

Preparing ourselves or someone in the sharing life, social life too, this is important to remember that life is not only business, to speak this language cannot to be only to manage work or to work and stop here!

When someone is ready to understand the step to have a good social life, this is the best and the right to do to live and share between anyone.

To share is socialization too, socialize and having fun too between people, cannot to be all always and only serious and always look like sadly time, to have a break and relax on life, needs to have a bit of funny time too. Like to say enjoy, to enjoy and to enjoy.

Now, at this time, under Christmas we preparing each kind of celebration, decoration and kindness, all is to live well in a social life, any kind of celebration or decoration, this is all to make a bit more rich our days, rich of kindness, of good time and lovely feeling too.

That's why we say "Preparing", to prepare us for our social life and staying in the peace, enjoying.

Chapter 5.

Sounds of old movie.

Watching the old movie of life, look like to be in a older movie too, with traditional sounds and traditional life, with a dress of the passed ages and with the ruin colors of the older dress.

In the spoken and in anything we can wear, we see the modernity too, in the same time, staying around an old dress of life, to make the mask and the carnival of the place.

Around me, always the same streets and always I see the same very older houses, the ruin walls and the smell of humidity on the much more older houses of the town, not renewed and without maintenance.

All looks like so ruin and looking the part of place without a bit of care, between the new town and the very old town with houses of mud and cooked mud too... with poor wood to build and with a so folk style. (We say: Folking style).

In the other part of the town, the new neighborhoods, with new houses, in a much more rich style, with much more fine style and sometimes, with much more money up to build too, this is the new generation of urbanization, in the same time, still living between very older and poor style and over we see the much more rich generation building near to the older ones too.

Like to live with the shadows of the past, the not full modernization and with a town realized over and over, up and up the older too. The place's always the same, the island doesn't change his shape and to build houses, the only place is the same old town.

Like to say, come back to the same old place, sweet home old sweet old home... always the same place, always the same home. To change place, needs to build a new life too in a new land and this is not for anyone. This isn't the chance of anyone, maybe this is the chance of the lucky one.

Walking in the streets everyday, between gardens and parks, sometimes full of trees and sometimes full of flowers, with some meadows and in this season, with the rain, looking the changes of the season, between the end of autumn and the first weeks of winter, with rain and sun, some days full of rain and cold and other days, so moderate warm, nor so cold, nor so hot...

In this season, the smell of rain and humidity is very invasive on my breathing, the smell is a mix of smells too, the smell of autumn and his end too, because in the Island, in December the season is not anywhere like in the other lands, near to Africa and the so and so South of Europe, always with the smell of the mediterranean sea too, with the smell of salty taste on the air.

It's easy to find prehistoric places and to see something of the stone age too, just I live very near, on the right way of the town, just few minutes driving the car, will be easy to walk on a prehistoric place, like the paleolithic and if we walk five more minutes around, this is easy to meet the mines and caves of miner works abound and around. Full of strange machine of the 1900s and around.

As it's easy to understand, this is not easy to describe all, because if someone is an very expert writer, okay's, this is his work, his job too. In the same time, this isn't my work and in my style and I can describe one part of the place, land and island too.

Between the mines and prehistoric places, this is so near the old Castle (Castel) too, all around an inactive volcano, on the feet of the volcano we see mines and over in the much more high part of it, this is easy to have the Castle (Castel) of the place.

I can say, only in one space we have any kind of generation, the prehistoric, the Middle Ages and the industrialization of the last century, with his fall down too all around the buildings and the ruin of the last century too.

Look like a small area of country cities and towns, in a sort of confusion of Ages, to let understand how much it's strange the life in a small island, we have to live between the prehistoric sites and near the civilization of last century, one over and over the older and under the underground too, because underground all is full of archaeological things to search and research...

This is the sound of the old place, the smell of the old place, the mixing of generations, the division of the place around the historical period. Come to see and you will see. You will see the lost too, the forgotten and the missed care too sometimes, all in one place, nor big, nor small, nor the best and nor the much more ugly too. One place's.

Chapter 6.

Smoke of fire.

Why to say smoke of fire, in our area this is easy to find a fireplace in each house, the use of fire too, everyday too, to have a good warm and because this is like a local work for some people.

Art or not Art, some see very important to be ready to build a fireplace in a house, to have a multi-use of that too, sometimes to have a good warm in winter, sometimes to cook, sometimes like design of the house or of the garden.

One part of our works, if I can tell, this is around to make wood, wood to burn on fireplace, like one important part of material to use to have hot warm, as any land, by the way, this is like a rite too.

To kick a badly wood of fire because this is not good to make a chair, because this is not good to create something like art-works and because this is so easy to understand the difference between a good wood and badly wood too, the badly is ready and always ready to be kicked in a fireplace to burn, because impossible to do something of better with a badly wood.

**Some take the work to make wood like a religion, like a philosophy and in the same time, work for the man! Maybe to show the power of the man, or maybe to be manly in a strange rite. I do too... I cut a bit of wood if I need... I go to make wood... I do... to be or not to be...
doing! Doing!
Like playing in the town!**

Yeah... we have any kind of thing and machine to have hot warm, good air conditioner and all around modernity, with the energy of sun, with the energy from wind too. In the same time, this is all so expensive in a small land, between the many chances of the modernity, still we had and we have “to do”... to let enjoy the wood heads!

Sometimes I go to work on the grove to clean, to let grow up the trees and all, this year I did a break from my works like that, because I feel tired, next years I will work again and again, yes, to explain how much the traditional doesn't let live in a modern life too sometimes. With respect for the traditional because who comes from, comes from and no problem! Alright... alright... just in peace.

About fireplace, this is so wonderful to feel the smell, may if someone like, to take a piece of bread with cheese and to cook on fire, in a natural style!

Yeah... because we don't like so much to use the modern oven to cook and we come back to the traditional because we like so much! So much at the time of the traditional too!

It's okay... just funny meanings... all around funny meanings too. Between music and using tech, low or high tech too, to stay between a bit of nature this is very nice, because cannot live in a only one room to have the same badly air on. Needs to change air sometimes, to stay in a park, garden and grove, this is very good for the health, just to don't stay all time with technologies on hands!

**Would you like to live with the robot tree?
Would you like to walk in a robot forest?
Maybe better's to take time in a good natural grove.
Sometimes... many times and at the time too.**

And the smoke of fire, from fire too, all around fire, this is to create clouds on the sky! Ah... ah... ah... when in the sky some forget to create clouds, the Sun is so hot on summer, like to stay under fire, so... the people loves to prepare the umbrella for Sun rays, so... they make lots of smoke to have a bit of shadows in the desert land! Just kidding about...

Yeah... the rite of wood and the rite of fire, by the way, we watch Hollywood movies, not because the European movies are ugly or make sleep the kid! Maybe because between each kind of bored hard works of life, we enjoy when Hollywood groups prepare some great movies for anyone too.

Com'on... you will see and you can see some channels showing each kind of rite about a fireplace, just, take a chair and sit near to feel the warm... Right's!

Chapter 7.

After some hours.

After some hours I come back here, to write another chapter, always around an easy day, the shopping of the day on market. To have foods and something like good water to prepare a coffee or tea, a soup or in any case, to have true water without chemical treatments on.

Natural and clean water from mountains, it's important to buy water because here the place doesn't give good water to drink, to prepare something like a soup or a tea, always and always we have to find natural water from mountains and this is not an illusion of good water.

Maybe, for me this is much more good a non alcoholic beer, this is like a meal on my day, like to increase my meal with a good beer, to haven't only bread and water. Like to complete the meal of the day.

In the same time, a good water is good to prepare a good coffee, the coffee is part of our days, an important easy drink for let feel awake full time in the day, to don't be so sleepy and to make someone so awake in the day.

The taste of the coffee is important and to prepare coffee with badly water, it makes badly coffee too, because the taste comes from the

coffee and the water to prepare it too... we care so much the water to prepare a coffee or a tea or a soup too.

Yeah... in this chapter I want to talk of the easy days, the easy things of everyday, like to walk in the street and decide what I can buy on a market, with always not many money in the hands and looking for the best with a poor salary of life.

Everyday we need of bread, a beer or a good juice, the coffee and some other foods like fruits and anything to have the enough for our body, also, I live in a vegetarian life, always I have to be milk/eggs/vegetarian style, because I need to have proteins and calcium from milk products.

Would be nice to be full vegetarian, by the body and stomach, to don't feel so hungry without meat or fish, to don't be like under malnutrition, I try to have everyday the enough for my body health too. Some people don't know that a Coke too is a good drink to take in a day to increase, because the ingredients are made to give energy to the body and to make the body so active and not sleepy.

Sometimes, watching tv news they make lots of reportage, some around the foods and drinks, telling what the land says good or not, this is all around traditional style too, the drinks or foods too. Like the diet of the land too, the diet of the place and how much we can have with poor money on hands.

I think this is important to be ready to talk and to write about that too, because if someone never had to listen or to see someone speaks of this easy life, maybe someone needs of an example too, needs to see someone talking or writing about easy life.

To talk of easy life, in the ordinary days, with the same wake up in the morning and the same lunch time, the same few minutes to make shopping of the day to have a meal and to have the enough for the weeks and days.

Yes, the ordinary days are the most important part of our life, between dreams and work, on our days we have many to write and to describe and to say, like to take the umbrella and sing in the rain like the movie, because this is the much more romantic part of life, to walk under rain, to get all wet and to make shopping in a market after some Km and Km of walk, with the wet umbrella on one hand, the jeans so wet because the strong rain and looking the best clothes with the color of water on because the rain all around our day.

Yes, this is not the trip on the moon, this is not the travel to fly in a new galaxy, this is the ordinary day and in my land, this is to rare to have the chance to say “ordinary days”, because for some it’s important only to talk about politics and politics at breakfast and dinner too, for lunch spaghetti of bureaucracy because the officer of the bureaucratic office is the lazy one of the land, to don’t work to make foods by his hands, he does kilos and kilos of bureaucratic paper, to trash, to make like spaghetti in a trashing box of the office, ...etc ...and when he ended his time... what to eat?

Spaghetti of paper and glue, because nothing tomato soup to put up!

Yes, in the ordinary day we have to find and bring all, to keep the costs of the life, the costs of the day too, to buy the enough with a poor salary of the day, not many money in the hands, at the end of the day... we say: ...welcome, this is another ordinary day.

An ordinary day of millions of ordinary days, in a ordinary life, like a standard life, planned from some for others and not for us in real... just the ordinary life of millions of ordinary life anywhere.

And go around, go around like a merry go round time’s.

Chapter 8.

My pets and lovely pets.

When the the night is so lonely, in the right hour, always I take my time to see how going all around my pets and they come to me, because at the right time it's possible to have the dinner for any pets, they love so much to be regular and at the same time of every night, like the appointment at the dinner time o'clock, they come to me like to ask the same sweet meal of the dinner time.

Always and always I like to see if someone is not around at the time, because the meal is for each one of my pets and they need always and always to have the meal of the day.

What pets are doing everyday for me, it's so easy to say... they work to clean the place around me, to have badly rats and to ask only one meal in a day.

What all to do for the lovely and kind pets, you have to understand, always they come around, looking for something of very sweet, like the sweet food of the day, like to see they happy when the right meal is as the pet's dreaming too.

And they play, the play fighting like a game to take the time, to grow up and to keep the time between pets at all, because pets are pets and not puppets. As you know, this is not the same... this is not the same, this is all another pair of shoes.

It's easy to talk too, because this is like to speak as the pets are speaking, not full of dictionary to use in a spoken, by the way, like a muted movie of the 30s.

What they do after the sweet and good meal?
So easy... they sleep so much.

Chapter 9.

All in one phrase.

**To be alive! I do and I'm doing to be alive!
If I don't, I cannot be alive.
Do you know?
Do you understand?
That's why, that's what we have to do on our land.
Not to be or not to be, just we are doing to don't die.**

**All in one phrase, it's possible to say:
We wait tomorrow to be very free in real.**

**All in one phrase I can say:
If the life comes from the gift of God for any human and any human is
part of the same draw of God, nobody is the owner of any other one,
and nobody is the owner of the others humans too, anyone is ready to
be owner of himself, when someone is around to try to be owner of
other humans, he is in a wrong way of life.**

**All in one phrase, it's real the real and it's not real the fake,
in the same time, in the same case, the fake is part of the real too,
because nothing is very real in the mind, because we come from a
world of liars.**

**All in one phrase... etc...
I can say many more times:
Look at you and if you're doing well for yourself, maybe you can do
well for your partner too.**

**All in one phrase, I can say and write:
I'm not here to teach something to you, I'm here to share my style.**

**All in one phrase, I can say and tell:
You have your life to live, as anyone has been to do, as we can do too.**

**Best regards my friends.
By Esu M. (born in Sardinia in date 16 December of the 1973's)
Book of the December 2019's.
Keep well on your life and have all the best.**

**Etc... etc... etc...
Will be better on next books too...**

A HUG!
